

DNF in Fedora 23

- The news from F22
 - Added missing options from yum
 - Implemented RFEs
- Upgrading Fedora distribution

Added missing options from yum

- DNF
 - --downloadonly
 - --repofrompath
 - SSL support
- DNF plugin repoquery
 - --available, --extras, --installed, --upgrades
 - --srpm, --alldeps
 - --tree for almost any query

Implemented RFEs

- mark command
- install_weak_deps configuration option
- Strict configuration option
- Notification which packages have been skipped during transaction
- save downloaded pkgs in the cache when transaction fails

Docs rewritten

- Fedoraproject.org for F22 and F23
- Main Fedora wiki pages

Fedup (system-upgrade)

- `dnf update --refresh`
- `dnf install 'dnf-command(system-upgrade)'`
- `dnf system-upgrade download`
`--releasever=<currentrelease+1> [--`
`allowerasing]`
- `dnf system-upgrade reboot`

Thanks for your attention
